🐙 <https://github.com/Ericamaeyers>

Front-End Developer with 4 years of professional experience building responsive, user-friendly, and high-performance web applications. Strong foundation in HTML, CSS, JavaScript, TypeScript, Bootstrap, PHP, MySQL, jQuery, AJAX, JSON, and Git, with previous full-stack development experience and hands-on exposure to React and Vue.js. Experienced working in Agile environments with Japanese cross-functional teams, utilizing Docker, Jira, and AI-powered tools such as Spek Kit to streamline design and development workflows. Contributed to AI initiatives by researching AI tools, developing effective prompts for UI generation, and collaborating on the development of an AI-powered support chatbot. Passionate about creating intuitive user experiences, writing clean and maintainable code, and continuously learning emerging technologies.

SKILLS

Frontend

- HTML5
- CSS3
- JavaScript (ES6+)
- TypeScript
- Bootstrap
- jQuery
- React.js (Exposure)
- Vue.js (Exposure)
- Responsive Web Design
- Cross-Browser Compatibility
- Performance Optimization

Backend

- PHP
- MySQL

Web Technologies

- AJAX
- JSON
- REST API Integration

Cloud, DevOps & Version Control

- AWS
- Docker
- Git

AI & Productivity Tools

- GitHub Copilot
- Gemini
- Claude
- Cursor
- Spek Kit
- Prompt Engineering
- AI-Assisted Development

Tools & Methodologies

- Jira
- Agile/Scrum
- Code Reviews

Design Skills

- UI Implementation from Design Mockups
- Responsive UI Development
- Wireframing & Prototyping
- Basic UI/UX Principles
- Typography & Color Theory

Soft Skills

- Problem Solving
- Communication & Team Collaboration
- Attention to Detail
- Time Management
- Adaptability
- Continuous Learning

EXPERIENCES

Front-End Developer

Forty Degrees Celsius Incorporated, Cebu City
March 2024 – July 15, 2026

- Developed and maintained responsive web applications optimized for desktop, tablet, and mobile (Android and iOS).
- Collaborated with designers, developers, and stakeholders to deliver well-designed, user-friendly, and functional interfaces.
- Translated UI/UX designs into responsive, interactive web components with a focus on usability and accessibility.
- Optimized application performance, improved load times, and ensured cross-browser compatibility.
- Worked with Git, Docker, Spek Kit, and Jira in an Agile development environment.
- Participated in code reviews to maintain coding standards and improve team collaboration.
- Gained hands-on experience with Vue.js, React.js, and TypeScript while contributing to frontend development tasks.
- Researched and evaluated AI tools to improve the development workflow, helping create effective prompts that accelerated and improved the accuracy of AI-assisted UI design generation.

- Contributed to the adoption of AI tools, including Spek Kit, to enhance development efficiency and team workflows.
- Collaborated with the team in developing an AI-powered support chatbot, contributing to frontend implementation and AI-assisted features.

Website Developer (Started as Website Developer Trainee)

Virtual Staffing Solutions, Ormoc City
May 2022 – February 2024

- Developed and maintained responsive, database-driven web applications using **HTML, CSS, Bootstrap, JavaScript, jQuery, AJAX, JSON, PHP, and MySQL**.
- Developed an internal company marketplace where users could redeem earned points for available items through a user-friendly web interface.
- Built and maintained an administrative dashboard for managing inventory, monitoring redemption orders, and tracking item availability.
- Developed secure authentication systems following industry standards for data protection and user privacy.
- Created dashboards, interactive reports, and data catalog solutions to support business intelligence and improve data accessibility.
- Worked with AWS services and gained hands-on experience with DevOps practices, including deployment, version control, and environment management.
- Collaborated with designers and developers to enhance existing websites, improve responsiveness, usability, and overall user experience.
- Participated in code reviews, debugging, troubleshooting, and implementing best practices to maintain high-quality, maintainable code.
- Delivered high-quality web solutions while providing excellent technical support and maintaining strong client satisfaction.
